

# MODERE® FAQs

## MODERE CELLPROOF MOISTURIZER

Personal Care | Skin

---

### Can I use Modere® CellProof Moisturizer alone, without CellProof Serum?

- CellProof Moisturizer may be used alone, but for best results we recommend a complete Modere skincare regimen that includes CellProof Moisturizer, CellProof Serum and CellProof Infusion Mask. The mask instantly awakens the appearance of your skin and preps it to receive all the benefits of the other CellProof products. Key ingredients in CellProof Serum work synergistically with components in CellProof Moisturizer, such as African birch bark (which helps distribute vitamin C to surface layers of the skin); a potent antioxidant found in CellProof Moisturizer. Also, the peptide blend used in CellProof Moisturizer will be further enhanced by the high concentration of BioCell Collagen® CG in CellProof Serum.

### Can I apply CellProof Moisturizer anywhere else besides my face and neck?

- Yes, CellProof Moisturizer works well for exposed areas such as the back of hands.

### How does CellProof Moisturizer fit into my regular skin care regimen?

- CellProof Moisturizer may take the place of your regular moisturizer or be used in conjunction to receive the added antioxidant and skin-firming ingredients. Cleanse your face and apply finishing products thinnest to thickest. In most cases, this means mask followed by toner, serum then moisturizer.

### What's the difference between the Liquid BioCell® in Liquid BioCell Life, Skin, Pure and Sport and the BioCell Collagen CG in CellProof Moisturizer?

- Both ingredients are backed by the same the Collagen/HA Matrix® Technology (naturally occurring matrix of collagen peptides, low molecular weight hyaluronic acid and depolymerized chondroitin sulfate), and both are in liquid form. However, the BioCell Collagen CG (cosmetic grade) is specifically designed to be stable and effective in topical/skin care applications, while the ingestible Liquid BioCell ingredient is designed for use exclusively in our Liquid BioCell products as a liquid-ingestible nutraceutical.

### How does CellProof Moisturizer work in synergy with Liquid BioCell?

- As the foundation of your skin care and anti-aging regimen, Liquid BioCell effectively supports the delivery and synthesis of collagen at the deeper layers of the dermis for long-term benefits.\* CellProof Moisturizer does not replace Liquid BioCell (or vice versa), but is instead an ideal complement, delivering topical BioCell Collagen CG to areas of the face and neck that may benefit from extra attention. When used together, the smoothing and hydrating effects of CellProof Moisturizer enhance the inside-out benefits of Liquid BioCell Life, Skin, Pure or Sport. Because it is ingested, the benefits of Liquid BioCell reach the entire dermis from head to toe as well as the hair, skin, nails and connective tissues, including joint cartilage.\* The benefits of CellProof Moisturizer are limited to the external areas where it is applied.

### Can I get results from CellProof Moisturizer without incorporating Liquid BioCell Life, Skin, Pure or Sport?

- Yes, absolutely. You can use any one of these products without the other. However, we recommend pairing the topical product with the supplement to achieve the ultimate benefits.

### Is CellProof Moisturizer paraben-free?

- Absolutely. Modere is paraben-free.

### Is CellProof Moisturizer gluten-free?

- Yes, it is gluten-free.

### Is CellProof Moisturizer fragrance-free?

- CellProof Moisturizer contains no artificial fragrance, but you may detect a light, pleasant scent from a combination of peach and vanilla aromatic extracts.

### Does CellProof Moisturizer contain an artificial dye?

- No. The peach-toned pigment of CellProof Moisturizer is completely natural. It comes from astaxanthin, a natural and potent antioxidant. Most naturally derived colorants are known to alter during product life. However, this will not affect the performance of the product.

### What is the best storage method for my CellProof Moisturizer?

- It is best to store it in a cool, dark and dry area. Keep CellProof Moisturizer out of extreme temperatures to avoid product color change or darkening.

### How often should I use the moisturizer? How long will one jar last?

- CellProof Moisturizer is designed to provide approximately a one-month supply in each container. The product should be applied twice daily, morning and night, for best results.

### What do I do if my pump stops dispensing product?

- There are small holes on the bottom of your jar that may be used to re-engage the airless pump. Use a small pin to push through the hole to the platform while pumping to re-engage. You may also turn the jar upside down and tap heavily to maneuver the platform. Alternatively, you can remove the screw-top lid and dispense an appropriate product amount using a clean spatula or finger.
